## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 78-101 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose, receiving a current frame comprising a frame sync segment and a plurality of data segments, wherein the current frame contains a current map indicating a location of at least first and second differently coded data in a first frame; a next map indicating a location of at least first and second differently coded data in a second frame, and a count indicating the number of frames until the next map becomes the current map; processing the at least first and second differently coded data in the first frame in response to the current map, as in claim **78**;

transmitting a current frame having a frame sync segment and a plurality of data segments comprising: inserting a current map, a next map, and a count into the current frame, wherein the current map indicates a location of at least first and second differently coded data in a first frame, wherein the next map indicates a location of at least first and second differently coded data in a second frame, and wherein the count indicates the number of frames until the next map becomes the current map, as in claim **85**;

receiving a frame comprising first and second fields each having a frame sync segment and a plurality of data segments, wherein the first field contains a current map

and count information, wherein the second field contains a next map and count information, wherein the current map indicates location of at least first and second differently coded data in a first frame, wherein the next map indicates a location of at least first and second data in a current frame, wherein the next map indicates location of at least first and second differently coded data in a first frame, wherein the next map indicates a location of at least first and second data in a future frame, and wherein the count information indicates the number of frames until the next map becomes the current map, and processing at least first and second differently coded data in a first frame, wherein the next map indicates a location of at least first and second data in the current frame in response to the current map, as in claim 89; and, transmitting a frame having first and second fields each having a frame sync segment and a plurality of data segments comprising: inserting a current map and count information into the first field, wherein the current map indicates location of at least first and second differently coded data in a current frame, inserting a next map and count information into the second field, wherein the next map indicates location of at least first and second differently coded data in a future frame, and wherein the count information indicates the number of frames until the next map becomes the current map, as in claim 97.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
